I can ride and balance a bicycle Yes No I have motorcycle riding experience Yes No

Riding a motorcycle requires alertness, coordination, balance, grip and fine muscle control of the hands and feet. Certain medical conditions and/or prescription or over-the-counter drugs may interfere with safe motorcycle operation. If you have a history of dizzy spells, fainting, seizures, epilepsy, muscular, balance/inner ear or other physical or stress related problems, are recovering from recent surgery or injury, and/or are taking medication(s), it is imperative that you consult with your doctor or pharmacist before the course to determine if your medical condition, or the drugs that you are taking for it, could interfere with your ability to operate a motorcycle. Please feel free to contact our office for details.

I have read and understand the Release, Waiver and Indemnification and the Cancellation and Refund Policy and agree to the terms and conditions:

Signature of the Participant

Date

You will receive confirmation of your course dates via phone or E-mail. Students will be provided with course information (directions, etc.) via mail or E-mail upon enrollment.
